#### Product information

Ideal for cooler conditions to keep the head and neck warm. The ribbed fabric allows for a snug comfortable fit. Wear with the FR10, FR11 or FR12.

#### Modaflame™

Garments can be layered to achieve an overall Arc Thermal Performance Value (ATPV) or Energy Break open threshold (Ebt) Rating. For example, thermals may achieve an Ebt of 4.3 Cal/cm<sup>2</sup>, and an outer coverall may achieve an ATPV of 13.6 Cal/cm<sup>2</sup>. However the combination ATPV will be greater than the sum of the two single layers, as the air gap between the two layers affords the wearer additional protection.

#### Flame Resistant

These state of the art products are the result of years of experience combined with advanced technology and market research.
